

## Choosing An Engineering Project: Decision Matrix Worksheet

**Direction:** Fill in the chart with your engineering design requirements and criteria and your proposed solutions. Use the following numeric evaluation scale for your rating: 2=meets all requirements; 1=somewhat meets the requirements; 0=does not meet any of the requirements. Add the scores, the highest score represents your best solution.

Engineering Design Requirements and Criteria	Solution #1:	Solution #2:	Solution #3:	Solution #4:
1.				
2.				
3.				
4.				
5.				
6. Other criteria:
